Background

HYDRA9 has processed in excess of USD 380,000,000 in illicit virtual-currency proceeds since its launch in June 2021. The service has been used to obfuscate transactions linked to ransomware proceeds (including affiliate payments to the BlackVortex Locker family), business e-mail compromise schemes, and the laundering of proceeds derived from the sale of fentanyl precursors.

Investigation, conducted in coordination with international partners, has identified the operational lead of HYDRA9 by handle. A criminal indictment has been unsealed in parallel in the Southern District of New York (USA v. John Doe a/k/a 'HYDRA9', 1:26-cr-00244-SDNY) — see related action.

As a result of this designation, all property and interests in property of HYDRA9 subject to U.S. jurisdiction are blocked. U.S. persons are prohibited from providing funds, goods, or services to or for the benefit of the designated mixer. Non-U.S. persons that engage in significant transactions with HYDRA9 face exposure to secondary sanctions.

Related action: Obsidian Ventures B.V. (Netherlands) is under review as a co-conspirator entity; a separate designation determination is pending.
